RE: COVID-19 Jobsite Protocols & Procedures

Dear Valued Customers,

In the wake of the Coronavirus, we want to address any concerns or questions you may have at this time or prior to any installation project. Our priority is to help ensure the health and safety of our employees and customers while designing, estimating and installing your landscape project.

Per Governor Larry Hogan's order, Landscaping is an essential business. Therefore, we are open for business in compliance with government regulations and health and safety guidelines related to the containment of the Coronavirus.

Our Crews have been instructed in safety, social distancing, cleanliness and protective measures while completing the landscape work on your properties.

Our Sales & Design Team will be able to estimate your projects and conduct meetings over the phone or virtually as needed. Site checks of current installations will also be conducted practicing COVID-19 protective measures outlined by the CDC (Center for Disease Control).

Stay safe and we will update our website COVID-19 info as needed.

As always, Thank you for your business!

All of us here at The Landscape Design Center, surely appreciate it!
